## 12. Master Data Settings

Enables the C&F Agent to populate and re-use frequently entered data items such as Clients, Consignees, Shipping Lines, Shipping Vessels, Transporters etc. This provides for rapid and error free data entry.

The screenshot shows the 'Shipping Lines' management interface in the CF PRO Online system. On the left, there's a sidebar with navigation links: 'Dashboard', 'Job Entry', 'Settings & References', 'Primary Data' (with 'Clients' and 'Consignees' sub-links), and 'System Inputs & References' (with 'Job Types & Documents' sub-link). The main area is titled 'Shipping Lines' and contains a table of existing shipping lines. A search bar is at the top right of the table. To the right of the table is a form for adding a new shipping line, with fields for 'Shipper's Name', 'Local Free Days', and 'TransitFreeDays'. Below the form are buttons for 'Demurrage Tariffs', 'Refresh', 'Delete', 'Save', and 'Close'. At the bottom left of the table area is an 'Export to Excel' button. The footer of the interface shows 'Copyright © 2020 Cybermonk Software' and social media icons for Facebook and Twitter.
